

H4 Thermal Camera

The Avigilon H4 Thermal camera line provides exceptional detection and performance with the combination of thermal imaging and patented Avigilon self-learning video analytics.

Operating beyond the visible spectrum, the H4 Thermal camera line is designed to detect the movement of people and vehicles even, in areas with poor visibility, challenging lighting conditions, absolute darkness and partly camouflaged scenes.

Through Avigilon self-learning video analytics, operators receive notification of detected activity that may require further investigation, helping them take decisive action when needed.

KEY FEATURES

Avigilon Self-Learning Video Analytics

Accurate Detection

Efficient Long-Distance Coverage

IK10 Vandal Resistance and IP66 Certified

BENEFITS

Combined with thermal imaging, Avigilon self-learning analytics provide greater accuracy and reduce false alarms.

See beyond visual camouflage or visual obscurants, such as smoke, dust and foliage.

Can help reduce total cost of ownership by covering long distances with fewer camera installations.

Durable, vandal-resistant and built for extended life in challenging weather and climate conditions. 320x256 uncooled thermal sensor technology with athermalized lens.
