

Avigilon Unity Access 7

Enterprise and Enterprise Plus Appliances

Keep your data safe and accessible, no matter the size of your system. The Avigilon Unity Access Enterprise and Enterprise Plus systems are IT friendly on-premise access control systems for enterprise-class installations.

The Unity Access system is a browser-based solution that comes with a full set of standard features that not only offer an intuitive and easy-to-use user interface, but will reliably safeguard your information. The replication option keeps your data in sync across multiple appliances and the hot standby auto-failover feature provides peace of mind with operational continuity.

Features

INTUITIVE

User friendly on-premise access control software with a browser-based client experience, requiring no software installation.

SECURE & RELIABLE

Unity Access appliances are built on a secure and custom Linux operating system, which considerably reduces the risk of virus attacks and helps to eliminate the cost of operating system maintenance.

SCALABLE

Enhance security and save costs with a scalable system that can connect up to 4,000 doors to a single appliance (Enterprise Plus only).

OPEN ARCHITECTURE

Built on an open architecture and supports open-platform hardware to connect with trusted products and solutions from leading third-party manufacturers.

INTEGRATED

Native integrations with Avigilon Unity Video, Avigilon Decision Management System and Orchestrate (enabling connection to Motorola radios and devices).

MOBILE FRIENDLY

Manage your system from any mobile device and swiftly perform daily operations with the Unity Access Mobile App.
