

VIDEOMANAGER EX ON-PREMISES DEVICE LICENSE OFFERINGS

ENSURE YOU HAVE THE VIDEOMANAGER EX ON-PREMISES LICENSE WHICH MEETS YOUR ORGANIZATION'S REQUIREMENTS.

CAMERA LICENSE

This license is required in order to use your camera with VideoManager EX. It also enables the following functionality:

FEATURES

5 YEARS OF SOFTWARE ASSURANCE

Phone support, email support, and access to new VideoManager EX releases within the 5 year period.

BODY-WORN CAMERA MANAGEMENT

Administer your suite of body-worn cameras from VideoManager EX. This includes assigning body-worn cameras to ensure that all recorded footage can be traced back to a specific user, and upgrading body-worn cameras to the most recent firmware.

Customize a wide variety of recording behavior for body-worn cameras, such as haptic feedback, LED behavior, pre-/post-record and video resolution.

MEDIA IMPORT

Import external media in common formats - such as PDF, MP4, JPG, and PNG - into VideoManager EX. You can then process, redact, and handle them in the same manner as body-worn camera footage.

MEDIA PREPARATIONS

Redact and annotate media (from both body-worn cameras and external sources) without adding it to an incident. This includes blurring, pixelation, zooming, and cropping.

STREAMING

Stream live footage from your body-worn cameras back to VideoManager EX, over WiFi.

ONSTREAM

Use VideoManager EX to serve live-streams and recordings from your body-worn cameras back to an ONVIF-compatible Video Management System (VMS). This enables you to view - and record - footage in a third-party VMS.

USER MANAGEMENT

Manage and streamline your workers' access to VideoManager EX using granular permissions, groups, and roles. Meet your organization's security policies with comprehensive password policies, automatic account locking after incorrect password entries and two-factor authentication.

REPORTS

Collate information about high-level system parameters — such as user behavior, camera field trips and equipment availability — into one downloadable CSV file.

CUSTOMIZABLE USER INTERFACE

Integrate VideoManager EX into your organization's brand identity with a configurable color scheme, logo and default language.

MAPPING & GPS

Filter your recordings from GPS-enabled body-worn cameras by location. VideoManager EX supports OpenStreetMap™, Google Maps™, and Esri™ map providers.

INCIDENTS

Group footage from body-worn cameras and other imported media into evidence bundles. Enables you to clip and redact videos in line with evidentiary requirements, and then share or export.

HQ BASE

This license enables more powerful VideoManager EX features, in addition to the functionality provided by your camera license.

FEATURES

CENTRAL VIDEOMANAGER EX

Enables hierarchical architecture with oversight over multiple installations: one instance of VideoManager EX acts as a Central VideoManager EX (which controls licensing, configuration and metadata) while other instances connect to it as sites.

STREAMING SERVER EXPORT

Use your body-worn cameras to simultaneously stream footage to a VideoManager EX instance and download footage to a central VideoManager EX instance.

IDENTITY MANAGEMENT

Export a VideoManager EX user list with one click, then easily modify and re-import, or quickly migrate to another instance.

USER IMPORT TOOL

Automatically sync your existing user database with VideoManager EX to easily manage joiners and leavers and ensure up-to-date user permissions. Compatible with multiple sources, including Azure AD™.

COMPOSITE CLIPS

Compile multiple, parallel viewpoints of an event into one video within an incident, then watch the clips back simultaneously.

ANTIVIRUS

Scan imported media for viruses in conjunction with a customer-provided OPSWAT™ service.

MEDIA PROPERTIES

Meet your organization's media categorization requirements with VideoManager EX's powerful custom fields (including dropdowns, checkboxes, and date/time fields).

ADDITIONAL LICENSES

These licenses ensure that your additional requirements are fully met.

PART CODE	DESCRIPTION
VM-EPL-STORE-1TB	Use VideoManager EX with customer-provided Amazon S3™ or Microsoft Azure Blob™ storage. Required for each TB of storage.
VM-EPL-3PVMS	Enables VideoManager EX integration with third-party VMSs. Required for every site which will be passing streams to a third-party VMS. Not required for integration with ONVIF-compliant VMSs.

SOFTWARE ASSURANCE

By default, every VideoManager EX license comes with 5 years of Software Assurance — this grants you access to technical support and VideoManager EX releases within that period. You can also add extra Software Assurance to your license, to ensure your organization always has the most up-to-date software with the newest features.

PART CODE	DESCRIPTION
VM-ESA-VB-12/24M-1	Extra 12 or 24 months of Software Assurance for a VideoManager EX installation with a camera license.
VM-ESA-HQ-BASE-12/24M	Extra 12 or 24 months of Software Assurance for a VideoManager EX installation with an HQ Base license.
VM-ESA-STORE-1TB-12/24M	Extra 12 or 24 months of Software Assurance for a VideoManager EX installation with a VM-EPL-STORE-1TB license.
VM-ESA-3PVMS-12/24M	Extra 12 or 24 months of Software Assurance for a VideoManager EX installation with a VM-EPL-3PVMS license.
