

## AXIS TQ1601-E Conduit Back Box

Aluminum conduit back box for increased mounting possibilities

AXIS TQ1601-E Conduit Back Box is an aluminum mount with a coating that alleviates corrosion. Its design with long screws and a washer helps dissipate vibrations, and the top/bottom and side conduit entries make installation easier. When used together with AXIS T94Q01A Wall Mount, the Ethernet cable can be routed through or along the wall (from left or right). The side and top/bottom-holes are compatible with 3/4" conduits, M25 cable protection products and with AXIS Conduit Interface (ACI) adapter range (NPS/U-shape). AXIS TQ1601-E can also be used to cover a single gang junction box.

- > **Aluminum**
- > **Coating in corrosion resilient material**
- > **Designed to dissipate vibrations**
- > **Conduit entries for ease of installation**
- > **Compatible with AXIS ACI Adapters 3/4"**
