

FibreIRS ODU32

Fibre Integrated Reception System

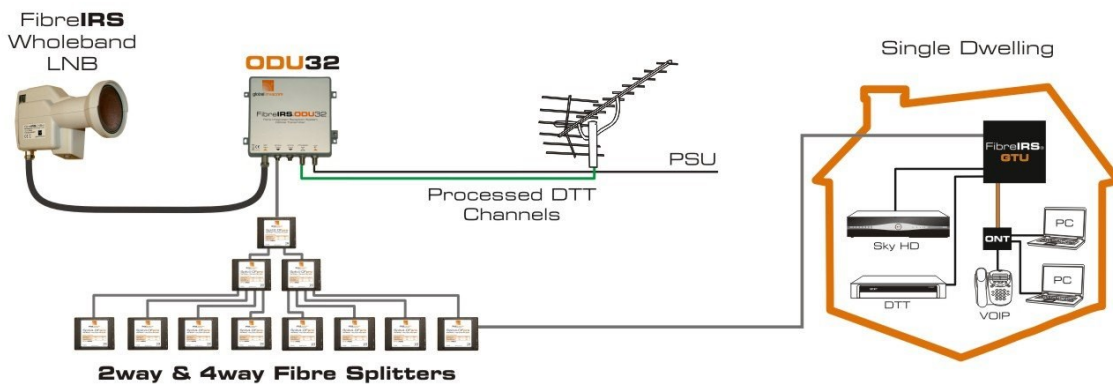

- Combines Wholeband LNB & DTT/DAB/FM signals
- Distributes signals to 64 outlets via two 32 way PONs
- Fully weatherproof (IP65)
- PSU, mast strap & mounting bracket included
- 10km reach*

Fully weatherproof, the ODU32 is designed for mounting at the antenna location. It accepts and combines signals from the Wholeband LNB and digital terrestrial antennae (DTT/DAB/FM) which then modulates a laser inside the ODU32. Two optical outputs (FC/PC) are provided for distribution through a Passive Optical Network (PON) of FibreIRS Optical Splitters. Each output of the ODU32 can feed a PON of 32 points or with reduced splits support a reach of 10km. Different FibreIRS GTU's can be connected at any point (Quad, Quatro & DTT/DAB/FM available).

* Subject to PON losses
