## How to read the table

- Calculations for motion-based recording for 1080p @ 5 fps, 720p @ 12 fps or 4CIF @ 30 fps.
- If using RAID 10 on Milestone Husky M50, you need to double the storage requirements.
- Frame rate is proportional to storage requirements:
  - (For example = 2 x fps = 2 x TB)
- MP is proportional to storage requirements:
  - For example; storage for 5 MP camera = 2.5 x 1080p camera, storage for 12 MP camera = 6 x 1080p camera
