

Net2 Entry

An installer guide

A door entry system for versatile security and building management

Net2 Entry

Enhanced door entry functionality for versatile security and building management

Net2 Entry allows a person inside a building to identify a visitor before they are granted entry. Upon recognition, the person can grant or deny access via their intuitive touchscreen monitor and open the exterior door as needed.

Net2 Entry can be used alongside Net2 access control to allow day-to-day access for users who have a Net2 token or PIN. A versatile grouping feature enables smart management of multi-tenant buildings and sites with fenced perimeters. The intuitive panel allows you to set up the display to show occupants by name, for straightforward building management.

Quick and easy installation

- Just 3 components – monitor, panel and control unit
- Components auto detect on setup
- Truly scalable system – expands using a standard PoE extension switch
- No need for specialist wiring diagrams
- Multiple panel options – flush mount, surface mount and surface mount with rain hood
- Intuitive user interface for camera integration – customers can easily add a secondary camera for extra security

Plug and play door entry in 3 simple steps...

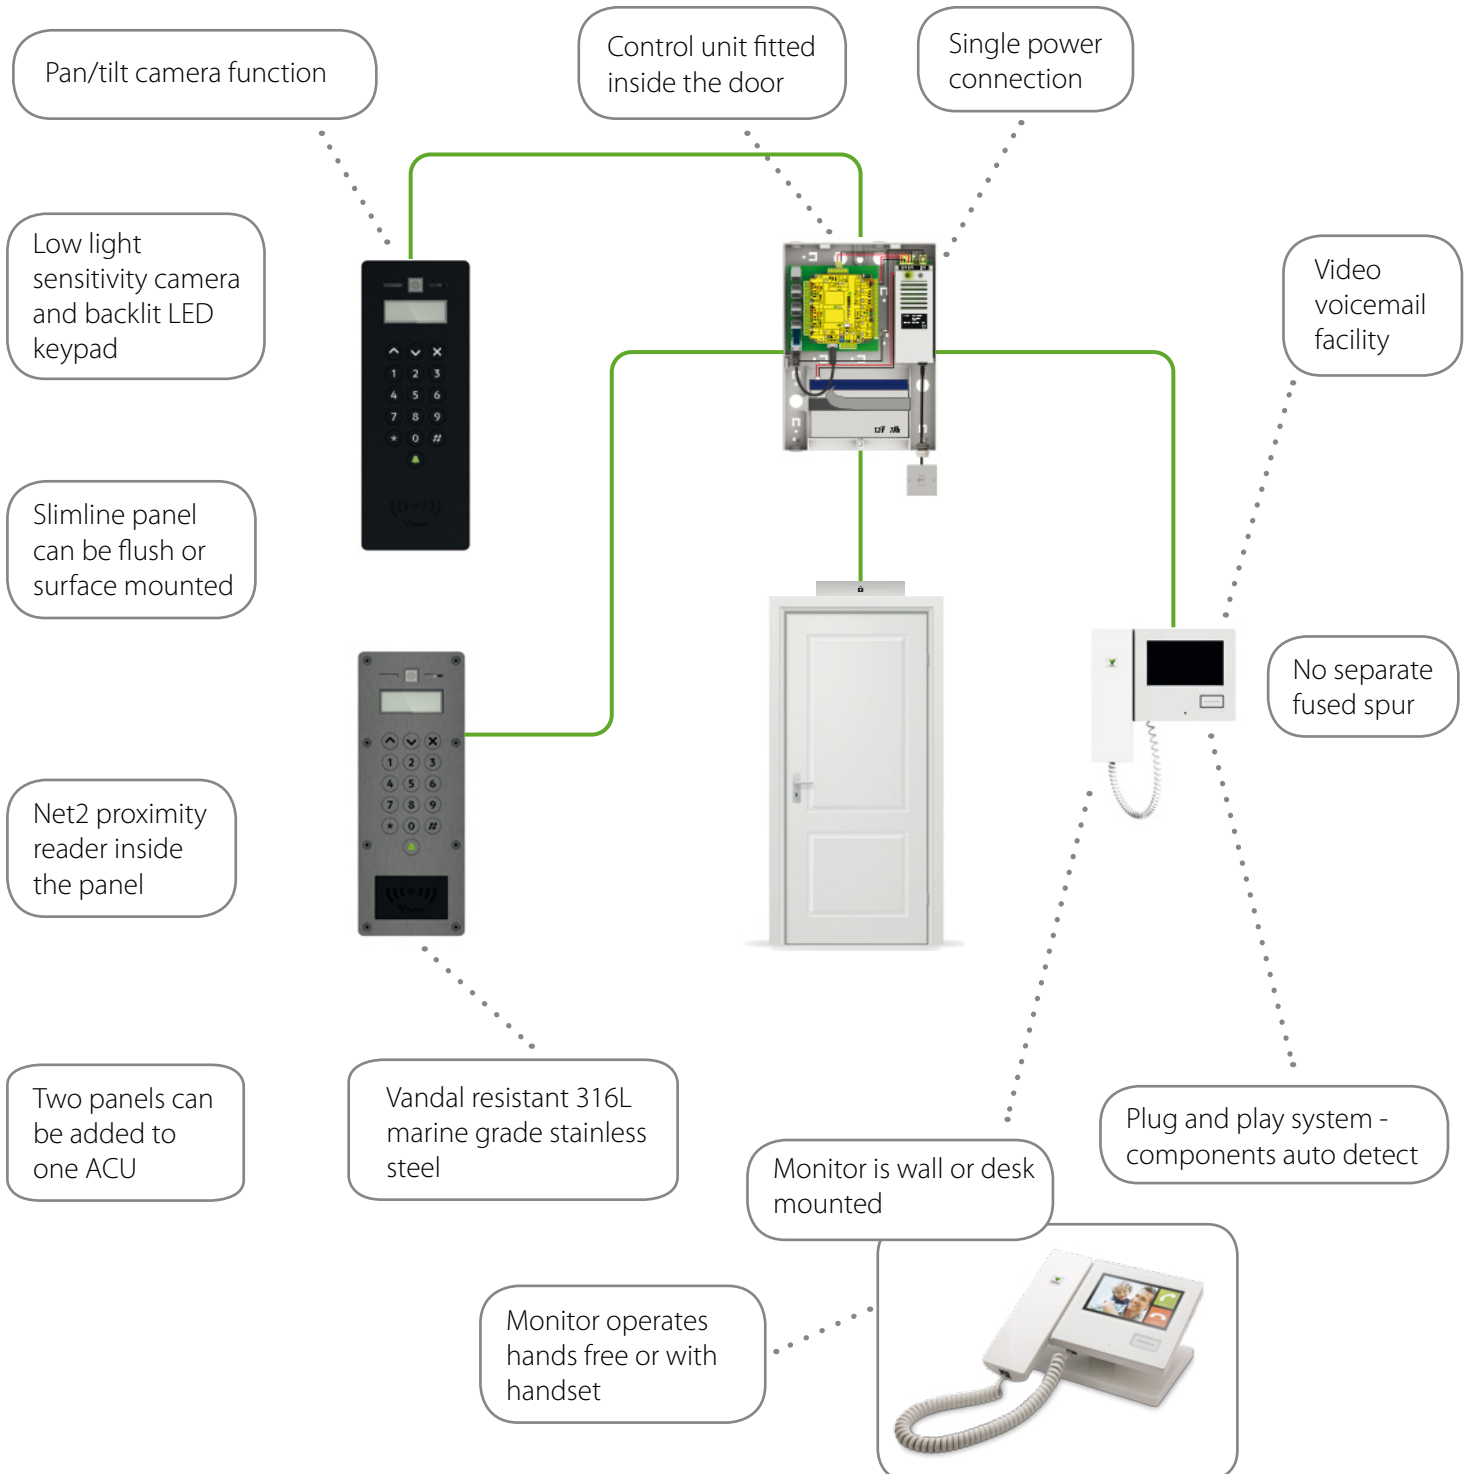

1. Screw monitor, panel and control unit to the wall
2. Plug in your 3 components
3. System auto detects and you're ready to go!

How does it work?

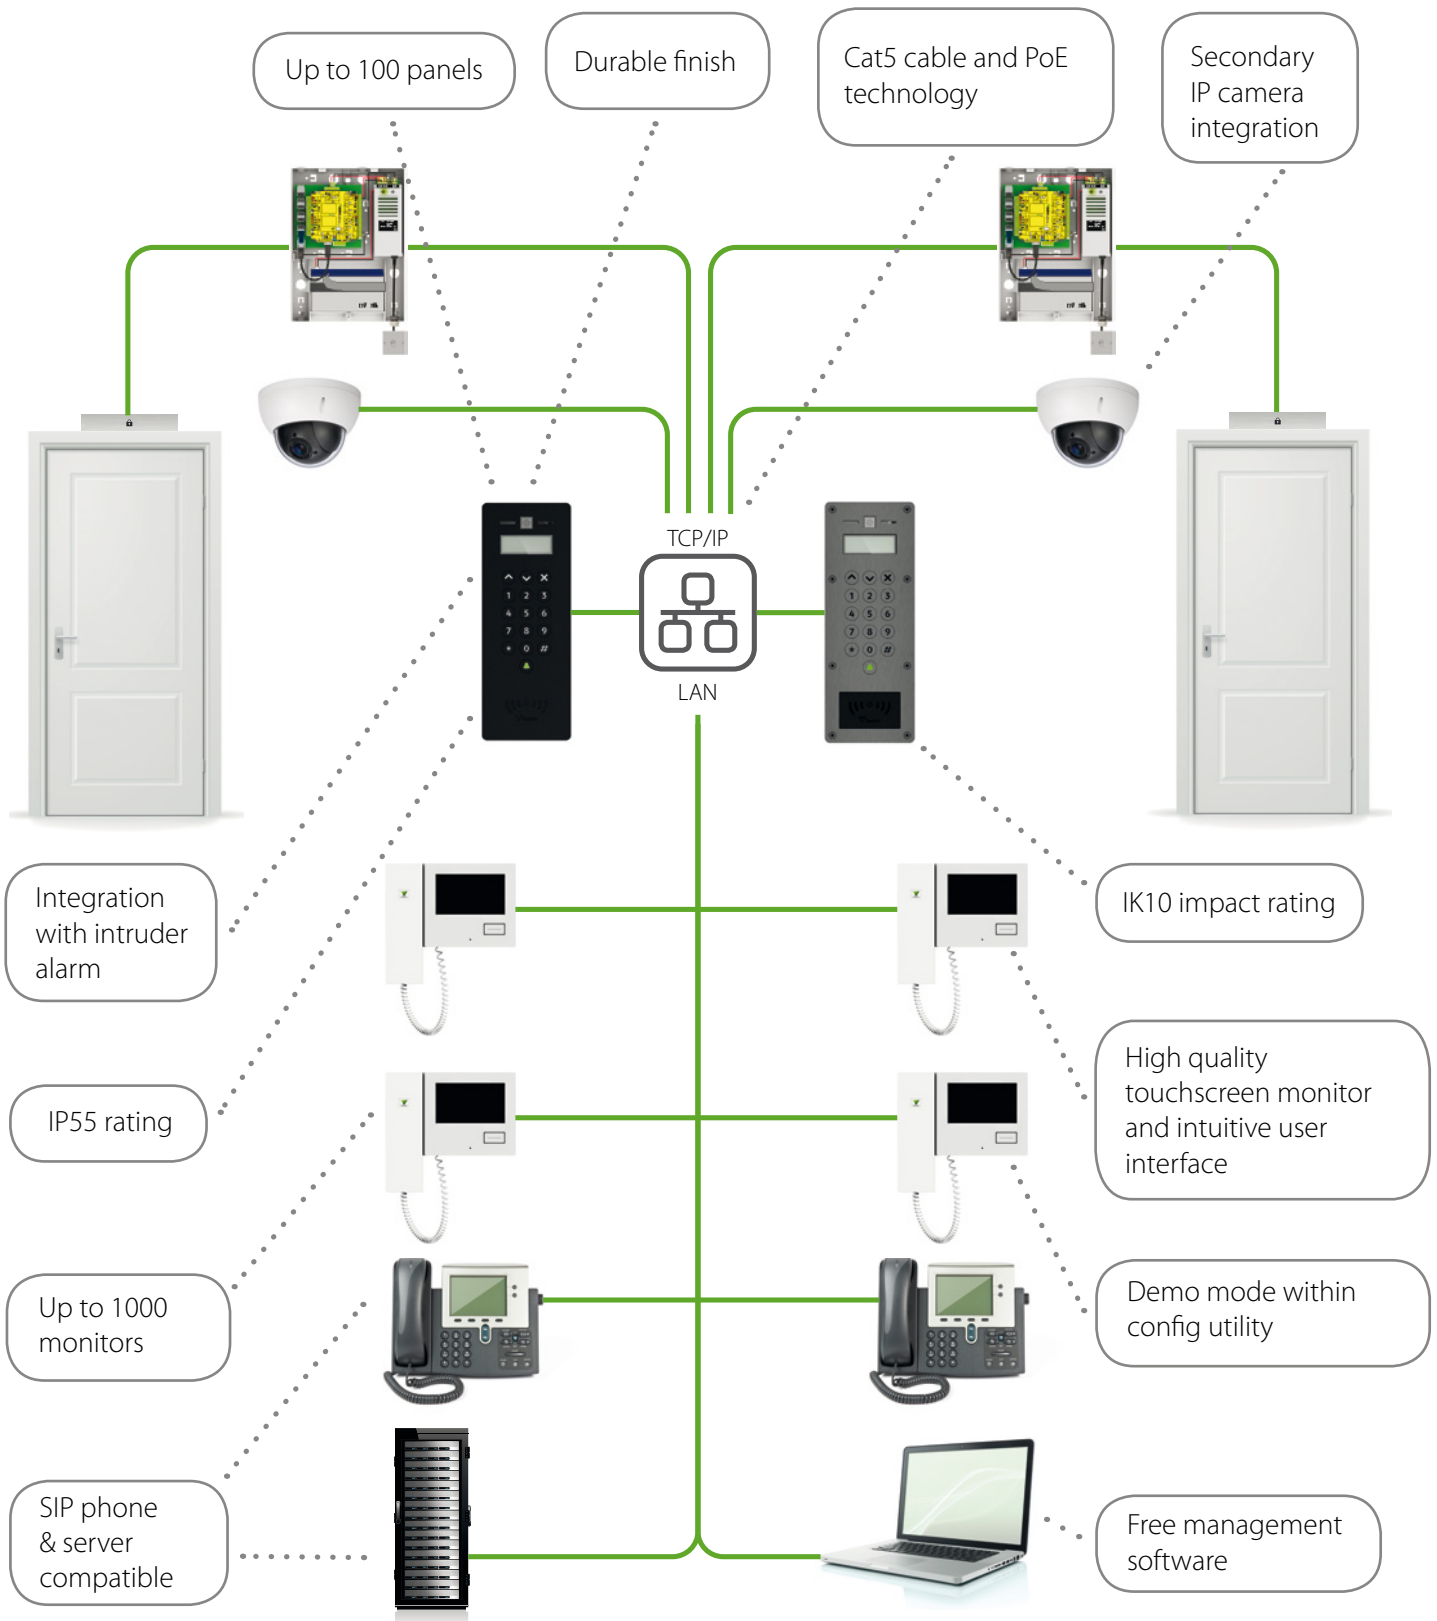

- Quick and easy to install - one type of cable is needed between components
- Fit using existing Cat5 infrastructure and connect via existing IP/PoE network
- Time and money saving - no need for separate power supply, comms and coax/video cable

A simple one door solution

Easy to extend via an IP network

- Once complex sites become incredibly simple
- Additional components auto detect when connected, with IPv6 technology
- SIP compatibility – the door can be answered from smartphone, tablet or PC*

*3rd party app required

Advanced features of the Net2 Entry system

Net2 Entry now has even more versatile features, advanced functionality and intuitive operation to enable you to offer your customers the ultimate security solution.

For versatile building management

- Grouping feature enables smarter management of multi-tenant buildings and sites with fenced perimeters
- Pan/tilt camera functionality to capture an angled view, for a diverse range of locations

For a solution that meets your customers' needs

- Multi-format reader – reads Paxton and MIFARE® token technology
- The standard panel features a high contrast backlit keypad

For a smooth installation and improved user experience

- Intelligent panel design displays occupants by name
- Intuitive user interface for secondary ONVIF compliant camera integration

Net2 Entry Touch

Smart, Simple Door Entry with a Premium Touch

.....

Net2 Entry Touch panel is the latest addition to our door entry range, compatible with Net2 access control. The new panel comes with premium features, including a quality 7-inch colour touch screen with customisable options, making Net2 Entry suitable for more sites than ever before.

► paxton.info/2784

Excellent Build Quality

- Advanced 7-inch colour touch screen, control at your finger tips
- Durable, chemically strengthened glass
- Easy to read anti-glare screen for optimal daytime viewing

Personalise the Experience

- Add your own logo on the welcome screen to provide a smart finish for the customer
- Multiple theme options available to personalise and suit a range of locations

Smart, Simple User Interface

- Straightforward and easy to navigate with dynamic search functionality
- Quick visual recognition for visitors by adding contact images and logos to the address book

From a Brand You Know and Trust

- Fully compatible with Net2 access control and the Net2 Entry range
- Easy plug and play technology, just 3 simple components

Suitable for More Sites than Before

- Line-out for use with T-Loop antenna for users with hearing aids
- Advanced sound processing with echo cancellation provides clear sound quality for busy areas
- High contrast theme available to ensure the screen is easy to read
- Site grouping for smarter management of multi-tenant buildings and sites with fenced perimeters
- Available in rain hood, flush and surface mount
