

Elevate Medium Density Fibre Optic Cassettes

Multimode, Base12

Product Overview

The Elevate Multimode Base12 cassette forms part of a modular medium density fibre solution, enabling dependable fibre connectivity in rack mount environments. Using Senko low loss MPO connectivity, the cassette provides a transition from a rear Base12 MPO interface to LC shuttered adaptors at the front patching field. Suited to traditional multimode network architectures, the solution supports efficient cable management and can accommodate up to 120 fibres in 1U when used with a compatible medium density chassis.

- ✓ Medium density 24 fibre LC to MPO cassette
