

## Horizontal earth bus bar kit

USpace horizontal 19" earth bar kit is used for earthing active equipment. The un-tapped holes within the bar allow for earth tags to be connected with standard 6mm fasteners.

Supplied with fixings and insulated stand-offs.

The earth bar must be connected to main earth point.

### Compatible with

USpace 4210, 5210, EDGE range.

Most EIA 310 compliant racks.
