

# UCoustic

The UCoustic Soundproof Rack delivers the ultimate combination of noise reduction and air-cooled thermal performance. It removes the needs for a costly comms room and can be used in any area including; offices, receptions, hallways, and cupboards, without concern for noise or temperature issues. The UCoustic Rack acts as a 1m<sup>2</sup> server room and allows for a safe and secure deployment of IT equipment whenever and wherever it is needed, saving space, cost, and deployment time.

The UCoustic Soundproof Rack is available in 3 different heights, 780mm wide and 1100mm deep with the ability to increase the depth by 300mm with the extension frame. The active rack has two EC fans in the rear doors to deal with higher heat loads and to ensure maximum energy efficiency, they are controlled with variable fan speed controllers with a dedicated fan curve.

## Save Money, Time and Space

- Cost Effective and Green
  - No need for dedicated comms room
- Cool
  - Innovative air-flow design means you can dissipate up to 12kW of heat with no special cooling requirements
- Easy to deploy
  - With our exclusive ramp solution, delivery to site is as easy as plug and play
- Expandable
  - Deploy another UCoustic when required
- Portable
  - Easy to relocate to another room or building

## Typical Applications

- Offices and Meeting Rooms
- Hallways and Cupboards
- Banks
- Hospitals and GPS
- Manufacturing Plants
- Laboratories
- Schools
- Hotels

\*Dynamic Load Rating is the total rolling mass of the rack and includes the rack frame, cladding and any fitted equipment and accessories and is subject to the load being evenly distributed at 20U height and below. Dynamic load relates to the movement of a rack within the same data centre on a smooth floor clear of any obstacles. Not suitable for transportation on a vehicle when loaded to this weight.

\*\*This figure will be affected if the filter is not fitted/regularly maintained
